Professional Profile

Frontend Developer with years of experience focused on building fast, scalable, and reliable web applications. I've shipped meaningful work across Web3, Fintech, Ecommerce and digital media platforms; Leaning heavily on automated workflows, thoughtful state management, and performance tuning to make interfaces feel effortless. Lately I've been pushing deeper into advanced animation and 3D experiences on the web, working with three.js to bring more depth and interactivity to the applications I build. My daily toolkit revolves around React and Next.js.

Technical Skills

- **Frontend & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
- **Styling & Animation:** TailwindCSS, SASS/SCSS, Shadcn UI, Framer Motion, GSAP, Styled-Components
- **State Management & Backend:** Zustand, Redux Toolkit, Context API, Prisma ORM, Node.js, Express.js, Django, Flask, Supabase
- **Databases & Tools:** PostgreSQL, MongoDB, SQLite, RESTful APIs, Git, GitHub
- **Testing & Quality Assurance:** Test-Driven Development (TDD), Jest, Playwright, React Testing Library

Professional Experience

Bisats Global Limited

Lead Frontend Developer | 2025 to Present

- Architected and developed the responsive mobile-web frontend for a decentralized, privacy-focused peer-to-peer (P2P) crypto and fiat trading platform.
- Engineered the UI flows for an automated escrow system, chat less transaction verification, and instantaneous auto-settlement/auto-swap features using Next.js and TailwindCSS.
- Built a high-conversion user referral program and integrated optimized mobile components to guarantee fluid performance, removing flashes of un-styled content.
- Designed clean state-management flows with Context API to manage real-time transaction updates securely without data leakage.

Creator Economy IQ

Frontend Developer | 2024 to 2025

- Built and optimized the interactive publication interfaces for a premier data-led intelligence and market analysis platform focused on the African creative ecosystem.
- Translated multi-layered distribution datasets and ownership architecture metrics into crisp, accessible UI dashboards using React and advanced CSS libraries.
- Implemented seamless content delivery layouts and secure subscription/checkout funnel integrations, enhancing user experience and page-load parameters.

Frontend Developer | 2024

- Developed a user-focused Web3 decentralized application (dApp) using Next.js to facilitate instant token-swapping workflows for crypto traders.
- Implemented strict SEO frameworks, clean routing mechanics, and target keyword optimization to boost Google indexing and organic ranking search results.
- Managed cross-origin state architecture to keep application behaviour seamless and stable during active wallet connections and heavy transaction cycles.

Trgst

Lead Frontend Developer | 2022 to 2023

- Headed the execution and deployment of two corporate website rollouts, accelerating net development cycle efficiency by 68% through components reuse and direct stakeholder alignment.
- Unified digital payment gateways into the product structure to allow secure checkout procedures.
- Constructed an interactive backend inventory management panel configured with explicit role-based access boundaries.

Freelance React Developer

Frontend Developer | 2022

- Converted initial user requirements into interactive frontend components utilizing React, standard hooks, and clean state handling practices.
- Collaborated closely with corporate clients to define structural system requirements and offer direction on architectural best practices.
- Wired low-latency RESTful APIs into client-facing client files to display dynamic dataset changes cleanly without degradation.

Education

University of Lagos | Lagos, Nigeria

Bachelor of Science (B.Sc. Ed.), Biology
